

Vehicle Vitals Website Storyboards

Last updated: May 20, 2026 Purpose: Website-only storyboard deck with screenshot-first pages for workshop and print review.

1) Format and Page Target

- Scope: website only (no mobile storyboards in this deck)
- Layout: each storyboard page starts with one prominent screenshot and keeps supporting context on the same page
- Target length: 12 storyboard pages plus 1-2 setup pages (12-14 total pages in print)

2) Coverage Matrix (Website Only)

Requirement stream	Source docs	Storyboards
Value proposition and onboarding funnel	BUSINESS_REQUIREMENTS.md, PRODUCT_DESIGN.md	SB-01, SB-02, SB-03
Vehicle setup and maintenance workflows	REQUIREMENTS.md, API_DATA_MODELS.md	SB-04, SB-05, SB-06, SB-07
Service provider conversion and trust	PRODUCT_DESIGN.md, SECURITY_IMPLEMENTATION.md	SB-08, SB-09, SB-10
Multi-vehicle operations and release readiness	RELEASE_SCOPE_MATRIX.md, R1_COMPLETION_CHECKLIST.md	SB-11, SB-12

SB-01 Marketing Value Promise

Business focus:

- Communicate value in under 10 seconds
- Encourage sign-in and first vehicle setup

Technical focus:

- Stable public marketing routes and asset performance
- Environment-gated access behavior aligned with deployment policy

Review prompts:

- Is value proposition instantly clear?
- Is the first call-to-action obvious and trustworthy?

SB-02 Sign-In and Returning User Access

The screenshot displays the 'Sign in to Vehicle Vitals' page. At the top left is the 'VEHICLE VITALS' logo, and at the top right is a link for 'Need help? Visit Help'. Below these is a grey bar stating 'Ads are disabled for this environment'. The main sign-in form is centered and contains the following elements: a title 'Sign in to Vehicle Vitals', a subtitle 'Access your secure garage, timeline, and upcoming maintenance.', an 'Email address' input field, a 'Password' input field with a 'Show' toggle, a dark blue 'Sign In' button, and two buttons for 'Continue with Google' and 'Continue with Apple'. Below the buttons are links for 'Forgot your password? Reset it' and 'Don't have an account? Sign up'. At the bottom of the page is another grey bar with 'Ads are disabled for this environment' and a footer with links: 'Plans', 'Getting Started', 'Help', 'Terms of Use', 'Privacy', and 'Contact Us'.

Business focus:

- Reduce friction for returning users
- Preserve trust through clear access patterns

Technical focus:

- Authentication route protection and redirect behavior
- Error-safe login state handling

Review prompts:

- Is login intent clear for all user segments?
- Are failure states specific enough for recovery?

SB-03 New Account Conversion

The screenshot shows a web form for creating a new account on the Vehicle Vitals platform. The form is centered on a light blue background. At the top, there is a header with the Vehicle Vitals logo on the left and a link to 'Need help? Visit Help' on the right. Below the header, a grey bar indicates 'Ads are disabled for this environment'. The main form area has a title 'Create your account' and a subtitle 'Set up your secure account and start managing your vehicle records.' The form contains three input fields: 'Email address', 'Password', and 'Confirm Password'. Each field has a 'Show' link next to it. Below the input fields is a dark blue 'Create Account' button. Underneath the button are two buttons: 'Continue with Google' and 'Continue with Apple'. At the bottom of the form, there is a link 'Already have an account? Sign In'. A second grey bar with 'Ads are disabled for this environment' is located below the form. At the very bottom, a footer contains links: 'Plans', 'Getting Started', 'Help', 'Terms of Use', 'Privacy', and 'Contact Us'.

[Plans](#) • [Getting Started](#) • [Help](#) • [Terms of Use](#) • [Privacy](#) • [Contact Us](#)

Business focus:

- Increase successful account creation
- Minimize abandonment during sign-up

Technical focus:

- Account creation validation and secure credential handling
- Post-signup transition to app onboarding

Review prompts:

- Which form fields create unnecessary friction?
- Is the next-step path clear immediately after signup?

SB-04 Vehicle Intake and VIN Start

V

VEHICLE
VITALS

GarageProfileTimelineUpcomingProvidersSign Out

Ads are disabled for this environment

Add VehicleBack

Enter the VIN, decode it for faster setup, then review or complete the vehicle details before saving.

Vehicle Setup

Year

Select Year

Make

Select Make

Model

Select year & make first

Vin

Vehicle Identification Number

VIN is required to save a vehicle. Decode fills year, make, model, specs, and recall data for you, and you can edit any missing fields before saving.

License Plate

Plate number (optional)

Mileage

Current mileage

Purchase Date

yyyy-mm-dd

Decode VIN

Add Vehicle

Decode is optional, but a VIN is still required as the vehicle's primary identifier.

Decode Preview

Decode a VIN to preview the vehicle profile, recall count, and spec fields that will be saved with this vehicle. If lookup is incomplete, update the form manually and continue.

Plans • Getting Started • Help • Terms of Use • Privacy • Contact Us

Business focus:

- Enable fast first-vehicle completion
- Improve data quality for downstream reminders

Technical focus:

- VIN decode integration and graceful fallback states
- Required-field validation aligned with Firestore schema

Review prompts:

- Does the form balance speed and accuracy?
- Is manual fallback obvious when VIN decode fails?

SB-05 Maintenance Entry and Record Quality

Business focus:

- Make maintenance logging repeatable and fast
- Protect service history value for owners

Technical focus:

- Maintenance CRUD consistency
- Data integrity for mileage/date/cost fields

Review prompts:

- What blocks quick entry for common services?
- Which fields are essential for analytics and reminders?

SB-06 Reminder Queue and Upcoming Actions

Business focus:

- Convert reminders into completed maintenance actions
- Reduce missed service events

Technical focus:

- Reminder lifecycle reliability (complete, snooze, dismiss, reopen)
- Calendar action resilience and fallback behavior

Review prompts:

- Is urgency clearly communicated?
- Are action choices clear enough for fast decisions?

SB-07 Maintenance Timeline and Decision Context

Business focus:

- Help owners understand what happened and what is next
- Improve confidence in maintenance planning

Technical focus:

- Timeline query performance and ordering consistency
- Accurate aggregation for multi-entry histories

Review prompts:

- Is chronology understandable at a glance?
- Which timeline details are critical versus optional?

SB-08 Records and Documentation Readiness

Business focus:

- Strengthen resale and warranty evidence value
- Keep maintenance records easy to review and export

Technical focus:

- Document linkage and record completeness
- Export-ready data shape and consistency

Review prompts:

- Can a user quickly verify complete service history?
- What record fields need stronger visual priority?

SB-09 Nearby Service Provider Conversion

[Plans](#) • [Getting Started](#) • [Help](#) • [Terms of Use](#) • [Privacy](#) • [Contact Us](#)

Business focus:

- Turn insight into concrete repair-shop actions
- Improve trust in provider recommendations

Technical focus:

- Callable provider lookup reliability
- Preference persistence for radius/type/make filters

Review prompts:

- Are provider results credible enough to act on?
- Is no-results recovery behavior clear and useful?

SB-10 Profile, Preferences, and Security Signals

Business focus:

- Give users confidence over account and reminder settings
- Support long-term retention through personalization

Technical focus:

- Preference persistence accuracy
- Authenticated profile data protections and access boundaries

Review prompts:

- Are settings grouped in a way that matches user intent?
- Where do users need stronger confirmation feedback?

SB-11 Garage Portfolio Overview

Business focus:

- Support multi-vehicle ownership workflows
- Increase dashboard utility for households and fleets

Technical focus:

- Vehicle list performance and state synchronization
- Summary metric correctness across multiple vehicles

Review prompts:

- Can users quickly identify each vehicle's status?
- Which portfolio metrics should be surfaced first?

SB-12 Vehicle Detail and Operational Next Step

Business focus:

- Help users move from awareness to action on one vehicle
- Keep critical service information immediately accessible

Technical focus:

- Detail view consistency with timeline/upcoming data
- Action routing stability to edit, records, and provider flows

Review prompts:

- Is the next best action obvious for this vehicle state?
- What detail modules should be reordered for clarity?
